Supélec – company partnership

Partnerships with companies have always been at the heart of the "Supélec system". Guaranteeing as it does the right balance between Supélec's teaching and research and the needs of industry and services, this strong association is present in all the various interactions possible between School and Company in the construction of a long-term, comprehensive alliance. Perci&s means:
- long-term partnerships;
- a guarantee of the quality of Supélec's teaching and research.

Perci&s

Supélec established this 'teaching and research partnership in cooperation with industry and services' or Perci&s, in 1986. It takes the form of a pluriannual agreement which guarantees the partner company a privileged presence within the school. In return, the partner company allocates a specified number of parts of the obligatory apprenticeship tax (taxe d'apprentissage) to the school on a regular basis and for a minimum period of three years. This contribution furthers the development of the School and/or the Supélec Foundation.

3 categories* of partnership according to the contributions made to the School and/or the Supélec Foundation

- 'The Circle' (13 advantages)
  an effective contribution of 5 parts* of Apprenticeship Tax or a contribution of more than 200,000 euros
- 'The Club' (9 advantages)
  an effective contribution of 3 parts* of Apprenticeship Tax or a contribution of more than 100,000 euros
- 'The Assembly' (7 advantages)
  a contribution of fewer than 3 parts* of Apprenticeship Tax

*For information: part 2014 = 15 500€

Exclusively for ‘Circle’ and ‘Club’ partnerships

The CCI&S

The Council for the Cooperation of Industry and Services (CCI&S) represents the active presence of companies within Supélec.

The CCI&S presents the viewpoint of companies regarding the School's major strategic orientations and projects and is consulted on these matters. It is also a place for exchange and joint reflection.

A more personalized kind of partnership

As well as the general contractual clauses of the Perci&s, Supélec also offers its partners the possibility to extend their cooperation on strategic or confidential matters through specific agreements centering on Supélec's various activities: higher and adult education, research, international relations, etc. These agreements define the fields, the modes and the organization of the cooperation. They establish a bipartite cooperation commission in which each partner actively proposes measures to be taken. Ultimately, these agreements establish a long-term, global, strategic partnership between their corporate signatories and Supélec covering a number of well-defined subjects of common interest.
